

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

ANNUAL REPORT

OF THE

State Board of Tax Commissioners

OF THE

STATE OF NEW YORK.

---

ALBANY, N. Y., *March 16, 1903.*

HON. FRANK W. HIGGINS, *President of the Senate:*

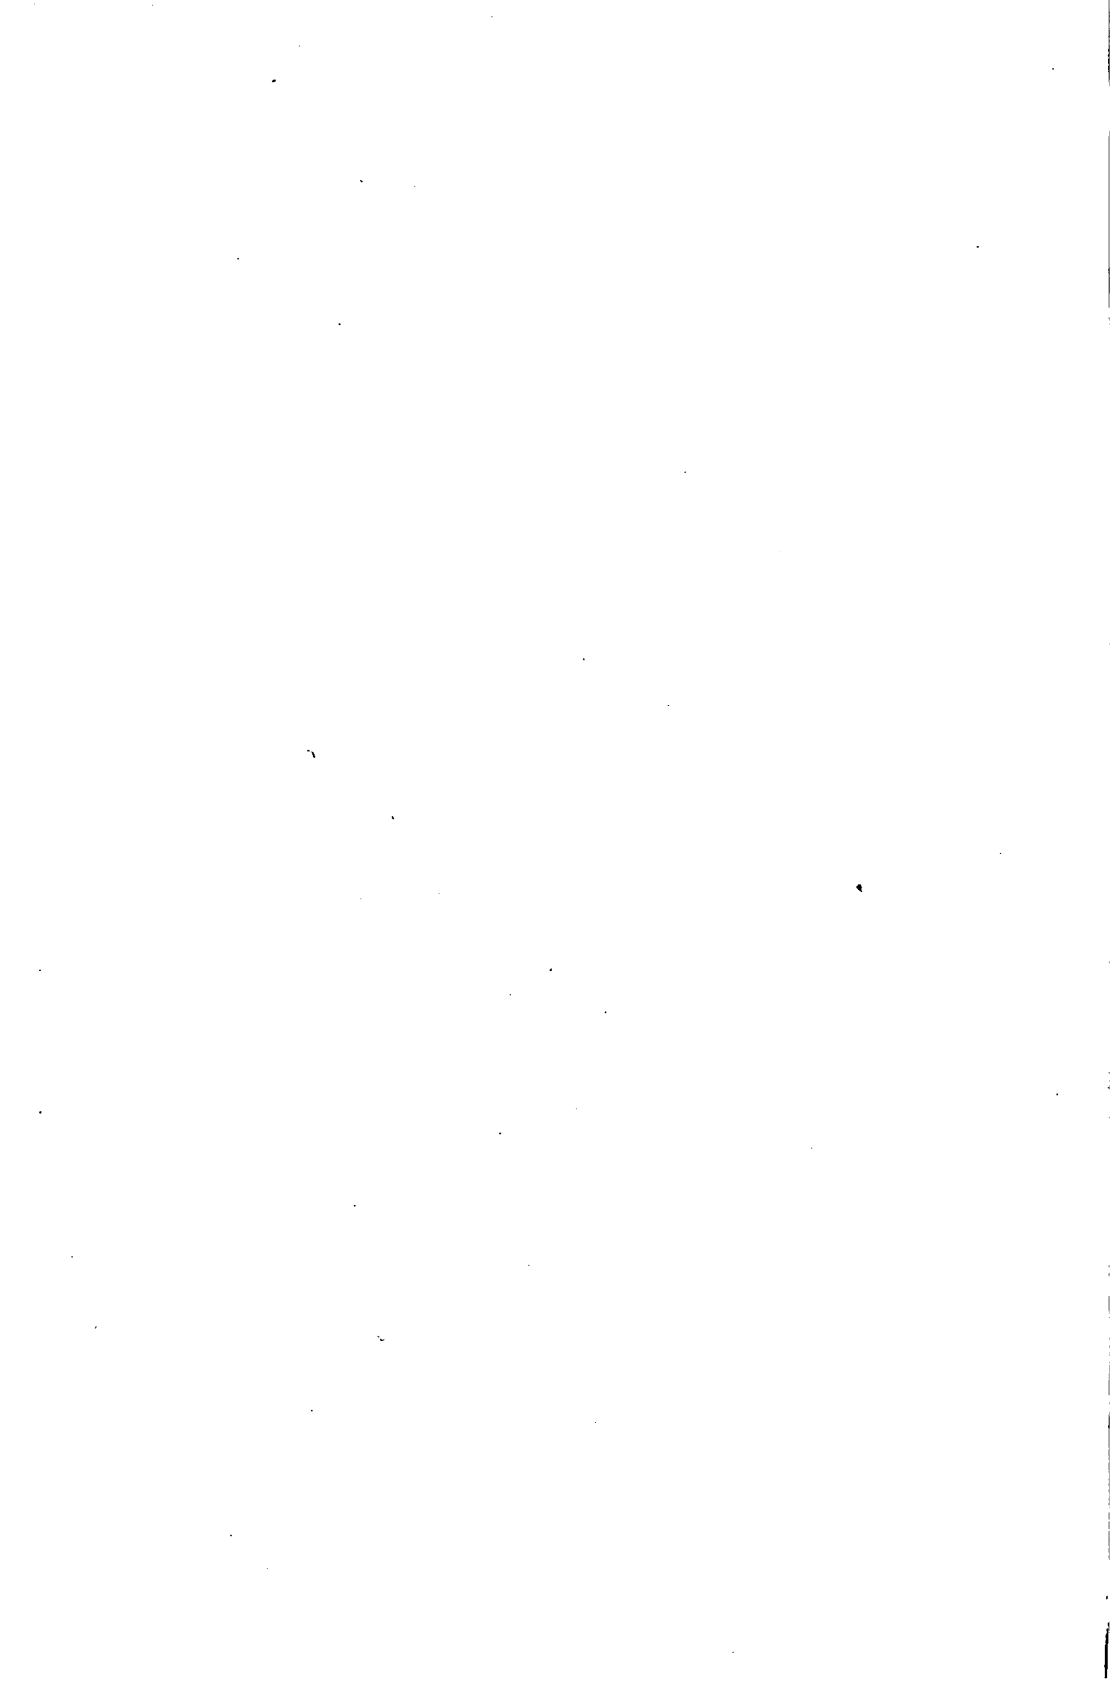

SIR.—We have the honor herewith to transmit our annual report for the year 1902.

GEORGE E. PRIEST,

J. EDGAR LEAYCRAFT,

LESTER F. STEARNS,

*State Board of Tax Commissioners.*

# REPORT.

OFFICE OF THE  
STATE BOARD OF TAX COMMISSIONERS,  
ALBANY, N. Y., *March 13, 1903.*

*To the Legislature of the State of New York:*

As by statute directed, report is hereby made to your honorable body for the year 1902:

The total assessed value of the property in this State in 1902, as revealed by the local assessment rolls and compared with the showing of 1901, is as follows:

Real property.		Personal property.	
1902.....	*\$5,290,651,879	1902.....	*\$672,753,169
1901.....	5,169,308,070	1901.....	701,565,906
Increase.....	<u>\$121,343,809</u>	Decrease.....	<u>\$28,812,737</u>

Total increase in the assessment of the wealth of the State during the year past, \$92,531,072.

## COUNTY VISITATIONS.

One-half the counties of the State were officially visited by this Board during the year 1902, in compliance with the law of 1896. The counties thus visited are enumerated in the report to the State Board of Equalization upon pages following. In that report, which forms part of this one, comparison is also made of assessment roll totals of 1901 with those of 1900.

It being a contention by parties in interest that special franchise valuations made for local assessment rolls by the State's

---

\* Estimating Westchester county.

representatives are arbitrary and discretionary, it is germane to note that such special franchise valuations aggregate 270 millions. The local assessments, fixing of county percentages for the State table, and the State table of equalization itself, are all and wholly discretionary and arbitrary, and treat values of 6,000 millions.

The character of the visitations and of the correspondence of this Department is annually varied and colored by the tax legislation of each year, which has been considerable and important during recent sessions.

There may have been in past legislative history equal agitation and discussion of the great subject of taxation in some of its phases, but there has not been in any like period anything like such a crystallization into tax enactments. It is through this Department that the Legislature promulgates its swiftly changing enactments in plain, practical forms to the army of local assessors, for their guidance, and it is as well the source of dissemination of court interpretations of the same.

Although the direct State tax has almost disappeared, the tax paid at this season of the year has come to be known as and is termed the "State and county" tax, and its payers, in more instances than intelligence can credit, are unaware that the direct "State" tax has virtually evaporated. It will be difficult to eliminate the time-honored, custom-encrusted misnomer of "State" from this tax paid early in the year; and equally difficult to make universally effective a requirement that the tax extensions on the rolls and collectors' receipts differentiate the purposes for which taxes are paid.

## APPEALS FROM SUPERVISORS' EQUALIZATIONS AND FIXING OF LEGAL RESIDENCE.

The appeals of the city of Middletown against the board of supervisors of Orange county and the equalizations of 1899 and 1900, which were reported pending before this Board one year ago, have been adjusted between the parties in interest, and discontinued.

During the year past this Board heard the evidence and arguments in the appeal of the town of Preble against the board of supervisors of Cortland county and the equalization of 1901, and dismissed the appeal.

Final disposition has also been made of the appeal in Suffolk county.

In the appeals of the towns of Greenburg and Mount Pleasant against the board of supervisors of Westchester county and the equalizations of 1899, decision has been made, according less relief than claimed, but sustaining the appeals made.

With the disappearance of direct State taxation, it may be advisedly predicted that the former protest of the metropolis against the State equalization will be multiplied many times by county equalizations. Rivalry among townships for advantage in the county tables will inevitably greatly intensify. Since local taxes are tenfold more than direct State taxation at high mark, abolition of the latter will naturally operate to concentrate vigorous contentions for advantage in county equalizations. Appeals from tax districts to the State Board will largely increase in number as result of injustices, genuine or imagined.

Under section 8 of the Tax Law this Board has been appealed to and has determined the legal places of residence, for taxation, of many owners of personal property, where contention has arisen with the local assessors.

## PURPOSES TO WHICH TAXES PAID IN 1901 WERE APPLIED.

This Board in its report of last year presented for the first time a tabulation by counties exhibiting taxes levied upon all assessed property for State, county, town, city, village and school purposes for the year 1900. The statement was compiled from the data procured from the local tax authorities by this Board. It has proven itself of such practical reference value, to tax officials and of such general interest to the tax-paying public that a like tabulation for the year 1901 is hereto appended. The summary shows a total of \$127,702,700.43 paid in taxes in 1901 in the sums and for the objects following:

City.....	\$71,600,711 44
Local schools.....	28,246,361 12
County.....	11,051,987 85
State.....	9,452,926 93
Town.....	4,219,203 54
Village.....	<u>3,131,509 55</u>

## ASSESSORS' TROUBLESOME TASK.

A mayor in a recent message fairly portrays some of the difficulties besetting an assessor's work in this language:

"The office of assessor is one of the most important in the scheme of city government, having to do with the sources whence revenue for the maintenance of the municipality is obtained. From his knowledge of the values subject to taxation and of their fluctuations arising out of local causes is, in part, determined the amount to be paid by individual taxpayers for the support of the government.

No class of officials is so much subject to complaint and abuse as is this class. The average citizen is averse to taxation and does not stop to consider that the assessor is bound in law and conscience to act justly upon all matters pertaining to his office, and does not hesitate to charge him with favoritism, political and personal bias, and to decry his judgment as of the ignorant and dishonorable. Forbearance with these people is often stretched to the point of rupture, and hence it is that the requisites of a good assessor are knowledge, justice and patience.

The question of taxation has occupied the minds of statesmen and law-makers from the foundation of governments, but as yet no definite or satisfactory solution of the problem has been found. Hence the laws in relation thereto are indefinite and obscure in many respects, both as to their meaning and direction, and their frequent change make them perplexing to assessors.

From year to year complaint is made that real estate bears more than its just share of taxation. Assessors endeavor to relieve realty of its overburden by searching out personal property escaping taxation and placing it upon the rolls. For this work they are usually severely and unjustly criticised. In the absence of any law compelling citizens to report the amount of their personal property subject to taxation, there is nothing for the assessors to do but seek out such property as best they can. In the limited time they have for the preparation of the rolls, and with the force at their command, it is impossible for them to cover an entire district by an inquisitorial visit to the mercantile houses and private residences to bring to view and to place under taxation such personal property as they might find. Besides, the assessors say, even if they could make such visits, it is a question whether or not it would be injudicious and hazardous to do so, for the reason that it would expose the standing and credit of business men and the private interests of citizens to a publicity extremely injurious to them and detrimental to the city, and that therefore the good sought would be overwhelmed by a resulting evil."

### SELF ASSESSING.

Ostensibly assessors assess personal property, while in fact, in the larger number and more important instances, the assessed assess themselves. Not only is the law impotent in this particular, but the selfish interest of a locality holds dominant sway. By menace of removal of home office, or factory or residence, millions of actual and liable personal shrink to thousands upon a roll.

Were it wise to herald them, very many bona-fide illustrations in veritable figures could be here given in corroboration; but it is assumed that the honorable senators and assemblymen are not without facts within their personal knowledge in their districts verifying the foregoing statement.

Possessors of personal property have come too largely to arrogate to themselves the functions of law-makers and administrators of self-made law. They in effect repeal or nullify a statute because opposed to "double taxation," taxation of "mere obligations" or "evidence of debts." The rivalry is for the least mark obtainable upon the roll in too many cases. The general effect is deplorable, where the conspicuously wealthy are

forfeiting residence or creating accommodating and transitory obligations for deductions. The query is arising with growing frequency and emphasis: "Why should deductions for debt, actual or temporarily incurred, be permitted to personal and denied to real property?"

### PERSONAL WEALTH.

A vague indication of the tangible wealth of the State is given in the total individual deposits of its financial institutions. From the latest reports the following is disclosed:

State and national banks.....	\$983,114,396 78
Trust companies.....	734,342,838 45
Savings banks.....	1,077,383,743 70
Aggregating.....	<u>\$2,794,840,978 93</u>

The appointments and furnishings of the households of the State, unassessed and untaxed, undoubtedly represent billions in actual value. Few and small are the entries upon tax rolls of stocks of goods in stores and ledger credits. These are assumed or represented to be offset by ledger debits. In some, if not all, cities it has become fashionable to maintain a mortgage upon the store structure, for deduction utility against goods assessment. In provision against the transfer or "death" tax envelopes are found to contain in securities advance apportionment among heirs of large estates, awaiting deathbed or later delivery.

This suggests that an amendment to the present tax law by which all personal property, except that legally exempted, including stocks of goods in stores, shall pay a flat tax of one per cent. upon its valuation as found by the local assessors, without any deduction whatever for debt, might be a step in the right direction in the way of personal assessment and might

result in turning into local treasuries large additional amounts of taxes upon personal for the relief of real estate. This plan has precedents in the treatment of trust company and bank shares and savings bank surpluses, as to a prescribed small flat rate, and in denial of debt deduction to shareholders in consequence of the low rate.

### MORTGAGES.

No roll shows a separation of the mortgage from other assessment of personal, nor can assessors so analyze their entries. This Board vainly sought this segregation during its 1902 visitations. From the data obtained in the rural counties it may be said in rough approximation that some seventy (70) per cent. of the realty is mortgaged from one-third to two-thirds or more of its value. The county clerk's records are said to disclose this condition.

Mortgagees represent that should their interest be largely taken for taxes they must call their loans and seek other forms of investment. Local assessors are loth to precipitate wholesale foreclosures and panic. They compromise with the condition existing rather than project widespread disaster upon mortgagors and their families.

Mortgage money lenders, to avoid record disclosures, are now exploiting inter-county transactions. Loans are made in counties adjoining the resident county of the loaner.

### PUBLICITY FOR ASSESSMENTS.

A pending bill amending the New York city charter by requiring public advertisement of all assessments commends itself to the approval of this Board. The publicity feature seems especially desirable throughout the State.

### DUMB DEEDS.

The consideration stated in deeds has ceased to furnish reliable guidance in assessment. In cities it may cover a building loan agreement; in the country, personal effects. In excess of a certain sum the federal revenue stamp may supply value measure. It has been suggested that supervisors supply to assessors, at frequent intervals, lists of transfers from county clerks' records, and in this suggestion may inhere some worth and merit. Certainly any and all assistance possible should be ungrudgingly furnished to local assessors. The pending bill commanding a State stamp or recording tax, if enacted, will operate to add to the weight of this factor, although excess in stamp payment may continue to magnify actual consideration.

### SUBSIDIZING INERTIA.

One of the most repugnant features of prevailing assessment is that one penalizing improvement. A citizen may expend \$1,000 in interior decoration or decking of his home without incurring proportionate increase of his assessment. A like sum expended upon exterior improvement of a home, ornamentation of a street and beautifying of a community is promptly punished by the assessor. The effect of this system is to encourage neglect of homesteads, it being well understood that a neatly maintained homestead is more valuable in the eyes of assessors than a neglected, weather-worn habitation. Under our existing law the assessors cannot be fairly criticized; but it is prejudicial to the State, to communities and to civic and individual progress and pride that improvement and advancement should be discouraged by fine. Could unimproved homes and vacant lands be the heavier assessed, sale of material and employment of labor would increase, handsomer communities would materialize, and the State take a long stride forward.

### THE STATE AS A REGULATOR.

Through exercise of its power to minimize assessment of its forest lands, the State has established a low measure for all individually owned acreage of similar character in many townships of several northern counties. While on the one hand there may be encountered tendency to assess too high the State's holdings, upon the other there is a leveling of individual possessions to a valuation manifestly inadequate. Were the State lands, constituting as they do one-third of the Adirondack forest preserve, permitted a higher assessment by the Comptroller, and given needed highway maintenance, larger valuations to the privately owned two-thirds and other adjacent wild lands could be held by the assessors.

### AN INTERESTING EXPERIMENT.

The latest assessment of the realty of the great metropolis attempts at an approximation to full value. A corresponding decrease in tax rate ensues. This compliance with law is commendable; and its influence throughout the State must prove healthful.

After recent and careful investigation of the workings of the New York City Department of Taxes and Assessments, under the administration of Commissioner James L. Wells and his fellow commissioners and their deputies, the State board is pleased to herein express and record unreserved approbation of the methods and efforts of the metropolitan tax officials in their endeavor to force a showing of practically full values upon the rolls within their jurisdiction. By their action they have refuted the unfounded but annually repeated attacks upon the percentage rating accorded New York in the State table of equalization.

Until the disclosures of undervaluation, under the administration of Commissioner Wells, it had been insistently and loudly proclaimed that metropolitan property was being assessed at full value while partisan State officials in equalizing would not so rate it.

The New York Department, under its present administration, demonstrates the unfairness of its assertions and contentions in former years.

It should be known that until 1904 — by which time there may be no direct State tax, and, consequently, no State equalization table — New York city can secure no State recognition by advance in percentage rating for the excellent work being done upon its tax records.

State equalization is made of necessity upon the rolls of the year preceding. The State equalization of 1903 for the tax collections of 1904 must be based upon the assessment of 1902.

Already it is being realized in New York city that the individual advancements where warranted and the general equalization to a uniform standard approaching the legal requirement are to result in benefit, not hardship, to the smaller property holders, including tenants. Better understanding is rapidly succeeding protest, with praise in the metropolitan district,—the larger half of the State in property and in people.

#### RECOMMENDATIONS.

This Board repeats its conviction that the per diem of local assessors should be increased, and their wholesale election varied to rotation, as urged in the report of last year.

The State Board of Tax Commissioners of New York recently met the State Board of Taxation of New Jersey for a conference upon a number of tax subjects, particularly the New Jersey

statute, which has been in force for about twelve years, providing that appeals may be taken by any taxpayer of that State to the State Board of Taxation in a very simple manner.

The New York State Board ascertained that this particular statute in question has become in many respects the most popular law upon the statute books of New Jersey. The administration of this law, by the New Jersey board, is so simple that every taxpayer in that State is said to feel that he can have ready access to that board to have his grievances adjusted, and that, too, in a very inexpensive way. It is found that appeals are taken by all classes of taxpayers, in many instances without the expense of an attorney.

The cases are quickly disposed of. The State courts are greatly relieved from tax litigation; and the statute, as administered, has become so popular that it has done away with practically half of the tax litigation of New Jersey; and the work of the New Jersey board has been universally sustained by the courts of New Jersey. In fact so popular has this law become, that when applications are made to the courts for writs of *certiorari* to review the board's findings, the courts now almost universally decline to take jurisdiction of this class of litigation; but recommend that such cases be determined by the State Board of Taxation. It is regarded as the people's court, where all can get speedy justice without expense or technical formalities.

Under the rules of practice of the New Jersey Board and the decisions of the New Jersey courts, the decisions of the board upon all questions of fact are final; and the courts take cognizance, in tax cases upon appeal to them from the decisions of the board, only when a question of law is involved.

Moreover, it is found that the effect of the law is to hold local assessors to just conclusions in valuing both real and personal property all over that State.

The New York State Board has given very careful study and consideration to this particular matter ever since its recommendation by Governor Odell in his annual message of 1902, and the passage by the Assembly that year of a bill embodying the Governor's recommendation.

By a statute of this kind the work of the courts of this State would be greatly reduced and their calendars largely cleared, as there are to-day pending in the State of New York thousands of *certiorari* cases other than special franchise cases.

#### SPECIAL FRANCHISE VALUATIONS IN AID OF LOCALITIES.

During the pendency of the litigation and until after the court of last resort in this State shall have confirmed the validity of chapter 712, Laws of 1899, known as the "Special Franchise Tax" Law, any recommendation amendatory thereof is withheld by this Board.

During 1902 this Board made 3,953 special franchise valuations aggregating \$268,017,770, an increase in number of 362 and an increase in amount of \$11,867,005 from the figures of 1901 reported a year ago.

The examination of reports to this Board by corporations and others began in January, 1902, and continued, with hearings upon tentative valuations and with the fixing of final valuations, to October first of that year.

In addition to the making of tentative or provisional valuations and the hearing of oral complaints, proofs and argu-

ments thereon, the Board made examination, investigation and comparison of more than a thousand verified documentary proofs and objections before reviewing, determining and certifying to the corporations assessed and to the local authorities the values finally fixed. The successive reports of several years and the accumulation of documentary data pertaining to them afford increasing facility and certitude in treatment.

Already the making of tentative special franchise valuations for the grievance hearings and for the final valuations for the local assessment rolls of 1903 is begun. For this, the fourth year, the reports of the corporations have been more readily and unreservedly supplied than in preceding years. Calls for information supplemental to the main report are almost without exception promptly and frankly met, or good reasons set forth for non-supply of the information thus sought.

With few exceptions corporations have now come to accept the special franchise tax law and its administration, satisfied that they will receive more uniform and equitable treatment under the present law as administered than in any other way.

#### LITIGATIONS.

Under the special franchise valuations for 1902, 164 writs of *certiorari* were taken against this Board. For 1901, 221, and for 1900, 278 writs were issued. The supply of data for returns to these writs is made by this Board, and involves much labor and research.

The forty-seven principal and so-called "test" cases tried and argued before the revered late Robert Earl, as referee, were decided by him in favor of the integrity of the law, and sustaining this Board in its administrative procedure. His

report and opinion were confirmed by Justice D. Cady Herrick, who appointed him. An appeal taken to the Appellate Division of this judicial department has been argued; and decision made by three of its justices, against two dissenting, reversing Referee Earl's and Justice Herrick's decisions as to constitutionality. Appeal to the Court of Appeals has been made, and early decision therefrom is expected.

#### SETTLEMENTS MADE BY ATTORNEY-GENERAL.

Appended is a list of settlements of litigations made through the law department of the State. A court order exists requiring the concurrence of the corporation counsel of a city or village affected in the making of such settlements. It has been the practice of the Attorney-General's office to consult this Board before entertaining an offer of adjustment by the court upon basis of the local rate of assessment of other real estate.

The valuations thus adjusted in 1902 amounted to \$14,479,328, and the taxes thereon, calculated at the average tax rate of  $2\frac{1}{4}$  per cent., yielded to local treasuries \$325,784.88. These figures will be increased by settlements, agreed upon and ordered by the court, not yet paid.

#### PAYMENT OF SPECIAL FRANCHISE TAXES.

We are advised that payment of special franchise taxes, without protest or legal resort, has been general throughout the State, outside of New York city and the larger corporations therein.

We reported as an estimate last year that, outside of New York city, taxes had been voluntarily paid upon fully 80 per

cent. of the special franchise valuations made in 1900. We are confirmed in the belief that this is a conservative estimate for 1901, and that the percentage may be fairly increased for this class of valuations of 1902 upon which taxes are being now collected or paid the third time.

### CHANGES NOW BETTER UNDERSTOOD.

Localities have come now more clearly to comprehend the recent changes in the taxation treatment of trust companies and banks.

The State Superintendent of Banks in his current report disposes of apprehension that the modest levy upon savings banks' surpluses can fairly operate to diminish dividends or interest on deposits.

"The savings banks have paid taxes for two years under the law imposing a franchise tax upon them equal to 1 per cent. on the par value of their surplus, and by comparison with the rates of dividends which they reported as paying in 1900, before the act imposing the tax was passed, 102 institutions made no change, three increased, changes by three others appear to have been only a new equalizing of rates paid to different classes of depositors, and nineteen made reductions. Of the last, seventeen were decreases from 4 per cent., which brought them into line with the movement proceeding on the part of nearly all savings banks for some years, and which was merely an adjustment of dividends to earnings, made imperative by the downward tendency in interest rates on high class securities. It is entirely safe to say that in every case where a reduction has been made it would have taken place exactly as it has done had no tax been imposed, for that tax amounts to only one-fourteenth of 1 per cent. upon the deposits, and the par value surplus of the banks, according to its determination by the Comptroller for the purposes of taxation, shows an increase from 1901 to 1902 amounting to \$3,189,208, which, of course, represents net earnings after the payment of dividends."

### INFORMATION, ACADEMIC AND PRACTICAL.

This Board has held correspondence and exchanged information with the taxing officials of several States and some foreign countries. The operation of the special franchise tax law in this State has elicited the liveliest interest in many sections of this country, and, in varied forms, the recognition and taxation

of "intangible" property is now in force in several States, and is in contemplation by the legislatures of yet others. The Board has kept abreast with the proceedings and essays of the State and national federations for tax reform. To Mr. Lawson Purdy, secretary of the New York Tax Reform Association, appreciation is expressed for full reports of the Buffalo national conference on taxation of May last; for prompt supply of the outputs of the league of this State, and for the contributions of very many eminent students on this all important theme, including his own practically valuable ones.

#### BAD BOOKKEEPING.

Since it is in prospect that localities are soon to raise and expend direct taxes for local purposes only, it would seem important, if not imperative, for each county, city, village and town to be required to so maintain its record accounts as to show readily and clearly the classified annual expenditures. A ledger account should bear debits and credits for each and every public purpose separately, as a merchant records his transactions with individual patrons.

In the quest for the figures constituting the table of taxes levied for all purposes, appearing herewith for the second time, this Board has been unpleasantly impressed with the universal lack throughout the State of methodical, systematic, localized and concentrated records of exact financial data of this nature.

In an article, in a periodical entitled "*Public Policy*," December 20, 1902, based upon this tabulation in our report of last year, Mr. Purdy addresses himself interestingly to the Legislature, the public and every tax district in the commonwealth in the following weighty words and figures:

"Under existing conditions in the State of New York we are unable to make any satisfactory comparison of the expense of any department of government of one city with that of another, and so bad is the system in use that we cannot tell accurately the expense incurred by different departments of the same city. A short time ago an examination of the books of the water department of the city of New York was made at great expense, and even then we were told that it was impossible to tell by the books, as now kept by the department, the cost of water and the revenue actually derived from the water department. The system of accounting of the City of New York certainly needs methodizing and simplifying, and there is no doubt room for improvement in every other city. Counties, towns and villages would profit even more than cities by supervision of their accounts, for they are often loosely kept.

"A brief examination of the report of our State Board of Tax Commissioners discloses extraordinary variations in the cost of government of the various counties of the State and of the total cost of the government of the various counties and the municipal corporations within them. The total cost of government per capita varies from \$24.01 in the city of New York to \$5.30 in the county of Clinton. Between these extremes we find the most populous county in the State next to the city of New York, Erie county, with an average per capita cost of government of \$16.57, and the least populous county of the State, Hamilton county, with a population of less than 5,000, with an average per capita cost of government, which is 2 cents more than it is in Erie county, being \$16.59. Albany county is the fifth county in the State outside of the city of New York in point of population, and the average per capita cost of government is \$12.42. In Westchester county, the third county outside the city of New York, it is \$16.38. A number of the least populous counties have a per capita cost of less than \$7.

"With the data which is now obtainable it is impossible to determine the reason for these extreme variations in per capita cost. We can explain some of them on the ground of causes that are known to us, but at best such explanation is purely speculative.

"The cost of county government varies in a way that is particularly astonishing. The greatest variations are doubtless accounted for by the fact that in some counties certain things are done at the expense of the county that in other counties are made town charges, but in the absence of any public accounting system we are here again left largely to speculation or to an investigation of independent counties which is too costly to be undertaken for ordinary purposes. Striking instances are those of Nassau and Suffolk counties, which lie next each other upon Long Island. Suffolk county is very much greater in area and has a population of 77,000, against a population of 55,000 for Nassau. In spite of this difference in population in favor of Suffolk, it costs more to run the county of Nassau and the various municipal corporations within it by nearly \$2,000 than it does to run Suffolk. The total cost of government in Nassau county is \$588,000 and in Suffolk \$586,000. The cost of county government in Nassau is almost twice as much as the cost of county government in Suffolk, being \$206,000 in Nassau and \$105,000 in Suffolk county. A still more striking variation in the cost of county government appears in the case of Wayne and Schenectady counties. Their population is almost identical, being 46,000 and 48,000. The total cost of all government is almost the same, being \$331,000 for Schenectady and \$314,000 for Wayne, but the county government costs Schenectady more than twice as much as Wayne, being \$96,000 for Schenectady and \$48,800 for Wayne.

"A uniform system of public accounting would at once disclose the reasons for such variations in the cost of government, and, more important still, it would show the relative cost of all the various departments of each city in the State and thus lead to economies which are impossible without such information.

"It is said that one of the most important features of economic saving effected by the combination of great corporations engaged in the same business has

been through the comparisons of cost made possible by this unification. The same advantage can be secured for all the municipal corporations of the State by a uniform system of public accounts.

"In my judgment, the bill prepared for introduction in the State of New York is well designed to carry out the purpose for which it is intended. Its enactment would be of such value to the State that we can hardly estimate it."

### ABSTRACT CONSIDERATIONS.

The general principle of taxation is that all property not exempt shall be taxed in proportion to its value. Notwithstanding this provision, it is safe to say that in none of the States in this Union are the results satisfactory. Uniformity and equality, the fundamental groundwork of justice, are conceded by all to fall short in any present system in any State for the proper distribution of the tax burden. The escape of so-called personal property from assessment is the great cause for dissatisfaction, and because only a small proportion of this class of property is listed or taxed, it is not surprising that economists advocate the abrogation of the system as vicious and immoral. The principle on which this archaic system is founded is that every one should contribute to the support of the State in proportion to his ability. But when upon the assessment rolls of this State we find an increase in real estate from \$1,599,930,166 in 1870 to \$5,093,025,771 in 1900, and of personal property in the same period of from \$425,607,732 in 1870 to \$593,895,907 in 1900, it argues some fault in the system, and there is yet to be found the State in which just ground for criticism and dissatisfaction, upon this or other grounds, is absent.

The federal census of 1870 gave the true value of real and personal property as \$6,500,841,264, showing that the real and personal property at that time were assessed about 30 per centum of their true value. The returns for 1900 are not yet available. Applying the same percentage, the total true value

of real and personal property in 1900 would be \$18,956,405,260. This seems an excessive amount, but it is the opinion of those well qualified to judge, that the value of personal property in this State is fully equal to, if it does not far exceed, the value of realty.

### BURDENED REALTY.

There are those who reason that a general property tax cannot be made to produce more revenue than at present; that the rate is so high, and the skill in dodging so well developed, that unless some other plan is discovered to reach personalty, any further increase in the tax rates must fall upon already overburdened real estate. These same persons argue that the first step necessary to produce more revenue, relieve the overburdened owner of real estate, and redress the inequalities due to the adherence to the general property tax, is the separation of State and local revenues. Many States have made such recommendations; some have accomplished it, and New York, practically from indirect sources, has neared sufficient revenue for the maintenance of the State government. In the separation of State from local taxes some of the inequalities may be diminished by confining operation to smaller areas; but even in counties, the same disposition is found, in the towns and cities, to so manipulate an assessment or an equalization that a portion of the county tax may be avoided. Real estate, from its nature, must and always will bear a full share of taxation; and efficient boards of a few men in each judicial district can be found with sufficient expert knowledge to adjust values, under chapter 820, between the tax districts if the supervisors fail. The remedy under the present law is by appeal to this Board; and, with two exceptions, its decisions have been accepted as final.

### INCREASE OF LEGALLY EXEMPTED PROPERTY.

Reports from the cities of the State show an aggregate exemption of \$853,279,090 in 1902, being an increase of \$91,541,607 over the returns of the year 1901. Reference is made to the last report of this Board, which recommended an amendment to chapter 689 of the Laws of 1900, providing that reports of exempt property be made from all subdivisions of the State, and not alone from the cities as provided in the present statute, which recommendation is hereby renewed.

### WHY TAX DEBT-EVIDENCES?

Many commissions have advised abolishing the deduction of debts from the value of personal property, claiming it unjust to real estate. If all tangible personal property were assessed at a low, flat rate as are bank and trust company shares, and no deductions for indebtedness permitted, many millions, if not hundreds of millions of dollars, would be added to the assessment rolls. Choses in action, or intangible personal property, being merely evidences of debt, if assessed at all, would clearly invoke double taxation. The value of these evidences of ownership of property, which are largely of a corporate nature, can be reached by an assessment against the corporation, the objection being the failure of the locality of the owner to receive benefit from wealth so held. But, when tangible property is assessed where located, should the evidence of ownership by a certificate be also assessed locally or for local benefit?

The Special Franchise Law enables the locality to get the benefit of the intangible value of any privileges or rights making certificates of stock valuable beyond the value of tangible property, and why then should not other corporations bear a like portion of local burden in like manner?

## LARGE AND ELOQUENT FIGURES.

In 1870, when farm lands in this State were perhaps at the highest market value, the value of farms was \$1,272,857,766. In 1900 the value of these same farms was reported as \$1,069,723,895, a falling off in value of \$203,133,871, or nearly 16 per centum.

The value of farm products in 1870 was \$253,526,153, and in 1900, \$245,270,600, a reduction in the value of farm products of \$8,255,553, or  $3\frac{1}{4}$  per centum.

The amount of capital invested in manufacturing in 1870 was \$366,994,320, and in 1900 it was \$1,651,210,220, an increase of \$1,284,215,900, or 349 per centum.

The value of the products of manufacturers in 1870 was \$785,194,651, and in 1900 it was \$2,175,726,900, an increase of 177 per centum.

The cost of materials, wages, salaries and miscellaneous expenses for 1900 is given as \$1,856,609,347, which, deducted from the value of the products of the manufacturers, leaves a net profit of \$309,117,553, being equal to 19.3 per centum on the capital invested.

The value of land, buildings and machinery invested in manufacturing is \$777,964,028, or nearly 15 per centum of the assessed real estate in the State.

## MORTGAGES.

The corporation tax, the collateral inheritance or transfer tax, the trust companies and savings banks surplus tax, and a portion of the excise tax appropriated exclusively for State uses, admit of no serious objection to the economic student. A mortgage tax would be concededly a revenue producer, and with a fractional per centum as the maximum rate upon this class of

property divided between the county and State, would seemingly be practicable and produce a more satisfactory result and much larger returns than under the present demoralizing condition. The application of this revenue to the county where the mortgage is given would insure its payment and reduce the county charges.

It is easy to find objection to any system of taxation, but it is yet for man to discover a satisfactory one. If each individual taxpayer could find his taxes diminished, that system, whether just or unjust, constitutional or unconstitutional, would be approved. But until every citizen comes to realize that he is individually a part of the warp and woof of government in the payment of the cost of such government, as well as in the enjoyment of its blessings, its solution will be postponed. In this connection quotation is made from a paper by D. C. Westenhaver, read at the National Conference on Taxation held at Buffalo in 1901, upon the separation of State and local revenues; and in his conclusion, quoting Professor Huxley:

#### HUMOR IN A SERIOUS THEME.

"It may not be amiss to add that the welfare of the State as a whole is the welfare of each individual. If taxation is not cumulated and piled up against any special class of persons or form of property; if the most profitable employments for capital do not escape a fair share of the burden, and throw the whole on the fixed capital of others, or on the consumption of the poor, minor inequalities may well be disregarded. The contribution from each member to the common fund in the form of taxation, as has well been said, is not merely an equivalent paid for protection either to person or to property. The gen-

eral public, through the organized agencies of society, is a silent partner in all forms of production. How much property could be accumulated if governments did not exist? How much would one's property be worth except for the organized social state? The debt we all owe to it is incalculable, and a cheerful contribution of a part of what it enables us to save and control, and to which it gives the chief value, is a small return on our part. That just taxation is not robbery, but only a proper division with the other partner, was most aptly put by Professor Huxley in the following language, and with it I shall conclude:

" 'I cannot' says the professor, 'speak of my own knowledge, but I have reason to believe that I came into this world a small, reddish person, certainly without a gold spoon in my mouth, and, in fact, with no discernible abstract or concrete 'rights' or property of any description. If a foot was not at once set upon me as a squalling nuisance, it was either the natural affections of those about me, which I certainly had done nothing to deserve, or the fear of the law, which, ages before my birth, was painfully built up by the society into which I intruded, that prevented that catastrophe. If I was nourished, cared for, taught, saved from the vagabondage of a wastrel, I certainly am not aware that I did anything to deserve those advantages. And, if I possess anything now, it strikes me that, though I may have fairly earned by day's wages for my day's work, and may justly call them my property, yet, without that organization of society, created out of the toil and blood of long generations before my time, I should probably have had nothing but a flint axe and an indifferent hut to call my own; and even those would be mine only so long as no stronger savage came my way. So that, if society having—quite gratuitously—done all these things for me, asks me in turn to do something toward its preservation, \* \* \* I really, in spite of all my individualist leanings, feel rather ashamed to say no. And if I were not ashamed, I cannot say that I think society would be dealing unjustly with me in converting the moral obligation into a legal one. There is a manifest unfairness in letting all the burden be borne by the willing horse.' "

#### DEPARTMENT FINANCES.

Of the appropriation made by the Legislature for its maintenance for the fiscal year ending October 1, 1902, this Board reports unexpended in the hands of the Comptroller, the sum of \$7,556.62.

We have made and transmitted to the Assembly ways and means committee careful estimate of the allowance believed to be necessary to the maintenance of this department during the

year to follow October first next; but, because it is impossible to divine the extent of referee proceedings and expert testimony requisite therefor, precise measurement is unattainable for the item of experts and their expenses.

Respectfully yours,

GEORGE E. PRIEST,

J. EDGAR LEAYCRAFT,

LESTER F. STEARNS,

*State Board of Tax Commissioners.*

# STATE BOARD OF EQUALIZATION.

---

Minutes of the State Board of Equalization, at its meeting held at the office of the Secretary of State, in the city of Albany, on the 2d day of September, in the year 1902.

Present: S. Fred Nixon, Speaker of the Assembly; John T. McDonough, Secretary of State; Nathan L. Miller, Comptroller; Edward A. Bond, State Engineer and Surveyor; John P. Jaeckel, State Treasurer; George E. Priest, Tax Commissioner; J. Edgar Leaycraft, Tax Commissioner.

Absent: Timothy L. Woodruff, Lieutenant-Governor; John C. Davies, Attorney-General; Lester F. Stearns, Tax Commissioner.

On motion of Mr. Priest, Speaker Nixon was made chairman.

On motion of Mr. Priest, Herbert L. Austin was made secretary.

The following report of the Tax Commissioners was submitted:

## *To the State Board of Equalization:*

The State Board of Tax Commissioners herewith presents the table of equalization, as between the counties, formulated by it, of real valuations, for the year 1902.

The aggregate of assessments upon all the rolls of the State for 1901, as reported to this Board, is:

Realty.....	\$5,169,308,070
Personalty, subject to State taxation.....	585,092,312
Total.....	<u>\$5,754,400,382</u>

An increased total of \$67,478,704 over last year.

The increase in realty is \$76,282,299 and in the total assessment for 1901 is included \$256,150,765 certified to local rolls as special franchise assessments by this Board.

The increase in assessments in this State, in 1901 over 1900, was made wholly upon realty; and is attributable to new buildings and betterments; and to special franchise valuations.

The vanishing of personalty from the rolls increases with cumulative celerity; property in this form having evaporated from the rolls to the following shown extent:

Total assessment of realty.		Total assess- ment of per- sonalty subject to State tax	
1901.....	\$5,169,308,070	1901.....	\$585,092,312
1900.....	5,093,025,771	1900.....	593,895,907
Increase.....	<u>\$76,282,299</u>	Decrease.....	<u>\$8,803,595</u>
From increase on real.....		\$76,282,299	
Deduct decrease in personal.....		8,803,595	
Apparent increase on both in 1901 over 1900.....		<u>\$67,478,704</u>	

The comparative slight amount of \$748,000, required to be raised by direct tax for State purposes, from the increased total assessment disclosed by the proposed table of equalization before you, permits the most infinitesimal State tax rate in the history of the commonwealth; the sums to be paid into the State treasury, upon this table, being only about one-tenth of the small sums of the year preceding. This diminution to the vanishing point of direct State taxation most happily occurs at a time when local demands are greatest and the loss of crops largest, in many sections, owing to abnormal climatic conditions.

The official visitations required by law have been made by this Board, during 1902, to the following counties:

Albany,	Herkimer,
Alleghany,	Jefferson,
Broome,	Madison,
Cayuga,	Montgomery,
Chautauqua,	Niagara,
Chemung,	Onondaga,
Columbia,	Ontario,
Cortland,	Orange,
Erie,	Orleans,
Genesee,	Oswego,

Putnam,  
St. Lawrence,  
Saratoga,  
Seneca,  
Tioga,

Tompkins,  
Wayne,  
Westchester,  
Wyoming,  
Yates.

The attendance upon these sessions, of the local taxing officials has, this year, been more prompt and fuller than any year heretofore, within the experience of the present Board. Never before have these meetings netted more satisfactory interchange of data and information between local assessors and visiting officials.

The board has inquired into the methods of local assessment; examined assessors and supervisors as witnesses under oath; compared sales considerations with assessed values; viewed property; questioned others than officials as to values; and in all ways permissible has sought such information as would qualify it to apportion with fairness to each county its just rating in the schedule of percentages, which forms the basis of the table of equalization now awaiting your action.

Hearings at our office have been accorded to individuals, counsel, committees and delegations seeking advantageous county ratings. We have sought to be fair with these special pleadings, as with the counties not thus represented.

We present the equalization table prepared by us; and recommend its adoption by your honorable body.

We have the honor to be,

Very respectfully,

GEORGE E. PRIEST,  
J. EDGAR LEAYCRAFT,  
LESTER E. STEARNS,

*State Board of Tax Commissioners.*

Dated ALBANY, September 2, 1902.

There being no appearance before the Board in reference to matters of equalization, the Board went into executive session.

## IN EXECUTIVE SESSION.

On motion of Comptroller Miller, the equalization table, as reported by the State Board of Tax Commissioners, was unanimously adopted.

On motion of State Treasurer Jaeckel, the Board adjourned *sine die*.

H. L. AUSTIN,  
*Secretary.*

The following table of percentages, showing relation of assessed to actual value of 100, and equalization based thereon for the several counties for the year 1902, was unanimously adopted:

County.	Per- centages.	County.	Per- centages.
Albany.....	80	Oneida.....	82
